Subject: Application for Full Stack Developer – Danyal Sarwar

Dear Hiring Manager,

I am writing to express my strong interest in the Full Stack Developer position. As a Software Engineering student at the National University of Sciences and Technology (NUST) with hands-on experience building scalable web applications, I am eager to bring my expertise in the MERN stack and Next.js to your team.

In my current role as a Software Developer Intern at TechCognify, I develop responsive UIs and robust backend APIs to ensure application performance and scalability. I thrive on solving complex, real-world business problems. For example, I built RetailFlow, a full-stack garment manufacturing ERP using Next.js 14, TypeScript, and MongoDB. This project reflects my deep technical involvement in automating factory workflows and integrating custom inventory management systems directly with active eCommerce storefronts like Shopify to streamline order fulfillment and tracking.

I would welcome the opportunity to discuss how my technical skills in React, Node.js, and database architecture align with your company's goals. Thank you for your time and consideration.

Sincerely,

Danyal Sarwar danyalsarwar1240@gmail.com
