SUMMARY:

MERN & Next.js Developer experienced in building scalable full-stack applications, REST APIs, and modern UI interfaces.

EDUCATION:

BE Software Engineering (CGPA 3.51) **Sept 2022 – Present**

National University of Sciences and Technology (NUST)

PROFESSIONAL EXPERIENCE:

Software Developer Intern ||TechCognify **Dec 2025 – Present**

- Working on the MERN stack and Next.js to build and maintain production web applications.
- Developing responsive UI and backend APIs, ensuring performance and scalability.
- Collaborating with team members to deliver features, fixes, and improvements.

AI Intern || ITSOLERA **Jun 2025-Aug 2025**

- Trained ML models and built React interfaces to present data-driven insights clearly
- Developed scam profile detection and computer vision–based inventory surveillance systems
- Implemented multi-modal risk scoring models for disaster-prone agricultural zones

Web Developer || Disruptive AI **Jun 2023 – Sept 2023**

- Developed responsive React-based UI for client dashboards, improving user engagement by 25%.
- Integrated REST APIs using Axios and optimized data fetching for faster load times.
- Collaborated with backend team to fix 15+ critical bugs during the release cycle.

PROJECTS:

RetailFlow-Garments Tracking System

- Built full-stack garment manufacturing ERP using Next.js 14, TypeScript, MongoDB, and Tailwind CSS
- Implemented multi-department workflow tracking with barcode generation and inventory management
- Developed automated payroll system with job costing and business reporting dashboards

AWAZ – AI-powered eCommerce for non technical sellers

- Built a multilingual eCommerce platform (English & Urdu) enabling non-technical sellers to manage products and orders
- Integrated agentic AI to automate inventory management and database interactions
- Implemented voice-based navigation to improve accessibility and ease of use

Healthcare Appointment sytem

- Built fully responsive multi-role portal for patients/doctors with real-time calendar booking.
- Integrated JWT auth + RBAC for secure patient/doctor access.
- Designed and exposed REST APIs to improve booking request efficiency and scalability

---

TECHNICAL SKILLS:

- **Frontend:** React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, shadcn/ui, Bootstrap, Material UI
- **Backend:** Node.js, Express.js, REST APIs, MongoDB, Supabase, PostgreSQL, MySQL, FastAPI, Python
- **Tools & Platforms:** Git, GitHub, Vercel, VS Code, Postman
